VENDOR MANAGED INVENTORY

BENEFITS OF VENDOR MANAGED INVENTORY

- Complete management of bill of materials
- Number of suppliers reduced to one
- Reduced processing costs
- Increased order accuracy
- Reduced stock outages
- Minimized inventory
- Lower overhead costs
- Competitive material costs
- Increased profits

K-STOCK

K-Stock is an automated, on-site delivery program designed to reduce:

- Replenishment cycle time
- Stock outages
- Inventory investment
- Supply chain administrative costs

TRADITIONAL PROCUREMENT PROCESS

Looking at the costs associated with the traditional procurement process, for every \$1.00 spent, only 59% is the actual cost of the part.

- Multiple transactions and hand-offs
- Large quantity of suppliers
- High processing costs
- High order-accuracy error

K-STOCK PROCUREMENT PROCESS

K-Stock is tailored to your unique requirements. Customers can achieve a 30% savings over the traditional procurement process by implementing a K-Stock program and fully optimizing all of the available savings avenues.
